

XTRACTOR

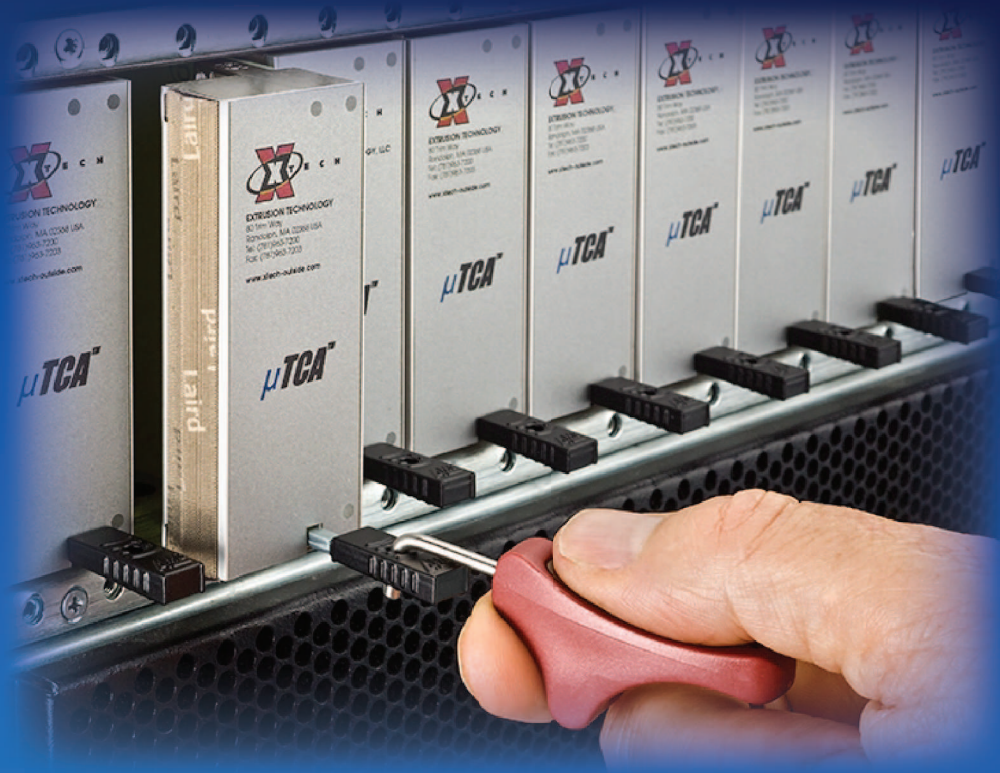

FEATURES

XTRACTOR handle is ergonomically designed to facilitate AMC module extraction

Removal of AMC's from MicroTCA chassis or AMC carriers can often be a challenging task - even under the best of circumstances. Cabling, close proximity of other boards, and the small surface area - all serve to complicate the task. XTRACTOR makes the task simple, fast, and error free by quickly grasping the handle hole with an ergonomic tool

Customizable handle (label, coloring) to reflect your company's logo/look requirements

Technicians and engineers in board testing, manufacturing, field service replacement, or lab/debugging scenarios will all find the XTRACTOR the perfect tool to improve efficiency and reduce extraction problems

XTRACTOR—The Essential Tool for AMC Extraction
