

AdvancedTCA® faceplate solutions from XTech

Fast. Flexible. Fully integrated mechanical solutions.

XTech is a full service, on-demand supplier of mechanical assemblies for circuit boards, offering a comprehensive line of AdvancedTCA faceplates, AdvancedMCs, MicroTCA, carrier boards, and other mechanical accessories. All products are available in both standard and customized profiles to support all of your design requirements.

Value added services from XTech

- In-house design assistance for custom assemblies
- Component kitting, finishing, labeling and full assembly
- Personalized, professional customer support to help you complete your project on time and on budget
- Fast turnaround for prototypes, production pieces, and custom orders
- Manufacturing operations in the United States and China
- Flexible material choices: aluminum, sheet metal, die casting and plastic

The advantage of extruded aluminum

- Lighter than stainless steel
- Extruded aluminum assures a strong rigid faceplate, eliminates costly post-process bending
- Variable wall thickness from 0.050" to 0.100" to accommodate components
- An unlimited variety of customized profiles to integrate with all AdvancedTCA platforms
- Recessed faceplate gallery area for label protects edges and assures alignment
- Extruded channel for EMI gasket prevents foam roll-over and protects gasket
- Unsurpassed EMI and RFI shielding
- Excellent heat dissipation

Executive Member

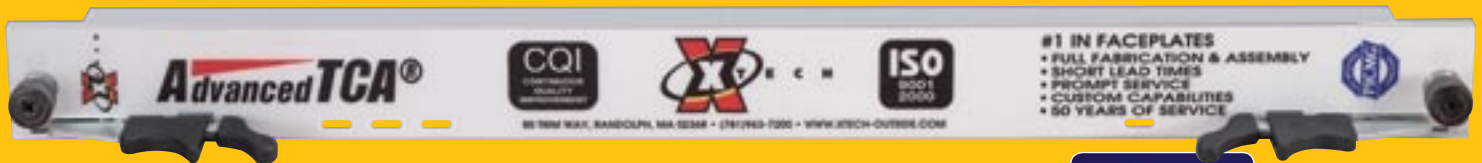

The #1 source for AdvancedTCA solutions

XTech offers a broad selection of standard-sized AdvancedTCA faceplate solutions. If "off-the-shelf" profiles don't fit the need, we'll customize modules to meet your exact specifications. XTech complements its product line with:

- In-house design assistance for custom pieces
- Component kitting and full assembly
- Variety of ejector options in black or custom colors
- Metal or fabric over foam EMI gaskets
- Custom labels/overlays
- Custom machining and punching
- Anodize, chromate, paint, powder coat, and silk screen finishes
